Proceedings of the Society for Experimental Biology and Medicine Volume 13 (Paperback)

By Society For Experimental Medicine

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 Excerpt: . zone from.2M NaCl to.4 or.45M NaCl. An attempt to repeat this experiment with a soap, which had been slightly acidified either by the addition of a minute quantity of oleic acid or of mineral acid, gave an entirely different result, an opalescence with increasing cloudiness and tendency to precipitation was noted between.2M and.4M NaCl, followed by complete precipitation at.45M NaCl. Further tests using varying proportions of soap, varying proportions of NaOH, and of NaCl and other salts of Na, brought out the remarkable fact that, as long as the soap employed was not too greatly diluted and was slightly alkaline, a jelly would be formed at all points between.2M Na and.45M Na regardless of whether the Na was derived from NaOH, from NaCl or other salts of Na. In very concentrated soap solutions or in very strong alkali the jelly formation commences at a somewhat...
