Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from A System of Measures of Length, Area, Bulk, Weight, Value, Force, C Ever since the middle of the present century a strong feeling has prevailed of the immense importance, if not of the absolute necessity, of introducing into England a decimal system of measures of length, area, bulk, weight, and value in place of the tangled and inconsistent medley which now flourishes. Royal Commissions, one after the other, have pronounced emphatically in favour of such a uniform decimal system, and more especially of the metric system used by the French. These reports bear the honoured names of Sabine, Herschel, Airy, and many others. And yet nothing has been done beyond making the use of the metric system permissive in contracts. We are of opinion, runs the Report of the 1863 Commissioners, that it is inexpedient that any legislation should take place with respect to the metric system until the whole subject of the weights and measures of this kingdom be brought before Parliament in one Bill. Good; but successive Governments have been invariably debarred from carrying out these reiterated recommendations by the fact that no single and complete system has ever yet been laid before Parliament. Various schemes dealing with the coinage or with weights, or with other measures have, it is true, been submitted, but nothing approaching to a complete and systematic whole covering the whole field of measurement. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
